

GRASSLAND TORTOISE FOOD

#1 GRASSLAND TORTOISE FOOD

Zoo Med's Grassland Tortoise Food now has more fiber! The new, improved formula contains more essential long-stem fiber grass and hay. This pellet size is excellent for large tortoises like Galapagos, Leopard tortoises, desert tortoises, and giant tortoise species (e.g., Galapagos and Aldabra). For juveniles and small species, try the Grassland Tortoise Crumbles.

- Carefully formulated for all life stages to replicate grassland tortoises' natural high-fiber and low-protein diet.
- Contains coarsely ground timothy, Miscanthus, and alfalfa to provide important long-stem fiber.
- Cold-pressed milled production maintains the integrity of all the long-stem fiber.
- Made with enticing fresh endive, escarole, and dandelion greens.
- Contains a source of live (viable) naturally occurring microorganisms. These probiotics help maintain digestive health crucial for long-lived tortoises.
